

# Revolutionizing IT Excellence Through Collaborative Partnerships

## Our Company

ampiO Solutions was founded in 2012 by a team of Microsoft Architects, Senior Systems Engineers, and Enterprise Service Delivery Managers with combined decades of experience in Office 365, SharePoint, Data Warehousing, BI, and Application Development. Our focus is in helping IT service organizations maximize their technology capabilities while providing maximum return on investment and lowering overall IT budgets.

Headquartered in Dallas, Texas, we focus on technology solutions that help organizations amplify the technology that runs their business by simplifying their software footprint. The ultimate goal is to maximize their ROI, increase employee productivity and decrease operational costs. We are committed to delivering end-to-end solutions that ensure sustainable future benefits to our customers and help identify their technology commitment as Capital Expenditure. We enable our clients to focus on their core business with efficiency and optimal employee productivity.

- Azure Migration & Modernization Program
- Azure Databricks
- Microsoft Purview
- Azure Open AI
- Azure SQL
- Azure Migration Tools

## Microsoft Security

ampiO Solutions security experts leverage the power of cloud, artificial intelligence, and machine learning to deliver intelligent and integrated security across four domains.

### Security Solutions

- Identity & Access Management
- Threat Protection
- Information Protection
- Governance
- Cloud Security

## Microsoft Modern Work – Microsoft 365

We create a modern digital workplace that enhances the employee experience and boosts productivity.

Experience the perfect synergy of people, technology, and operations as we empower your workforce to collaborate securely and work seamlessly from anywhere, on any device.

### Products supported:

- Microsoft 365
- Microsoft Viva
- Microsoft Teams
- Microsoft Surface

## Microsoft Power Platform

Speed up app development, automate workflows, visualize data, and reduce repetitive tasks with AI-powered tools. We bring Microsoft's Power Platform to life with a secure and composable architecture to help you confidently move forward.

### Products supported:

- Power Virtual Agents
- Power Automate
- Power Apps
- Power BI

## Microsoft Device Management

Manage and secure devices, apps and data from a unified console. ampiO's device management is a critical component of any organization's security strategy. We ensure devices are secure, up-to-date, and compliant with organizational policies. We protect the corporate network and data from unauthorized access.

### Products supported:

- Microsoft Intune
- Microsoft System Center Configuration Manager
- Microsoft System Center Operations Manager

## Microsoft's Data Analytics and AI Services

Our business analytics and visualization experts specialize in making your data not only more visual but also more valuable. We transform raw data and dense spreadsheets into purpose-built dashboards and graphical, on-demand reports, enabling you to make business decisions quickly and confidently.

### Products supported:

- Microsoft Fabric
- Microsoft Intelligent Data Platform
- Data Analytics Solutions

## Microsoft SQL

ampiO's certified SQL Server developers and database administrators offer their expertise to assist businesses of any size in creating, managing, and troubleshooting applications based on the Microsoft SQL Server platform and .NET framework. Our SQL Server experts can provide support at any stage of the application life cycle, whether it's for small office or departmental databases, N-tier VLDB solutions, or enterprise-class data warehousing.

## ampiO Advisory Services

Our Advisory Services are designed to foster a business strategy that prioritizes employees and customers throughout the customer experience journey, offering comprehensive management and support.

## Mergers and Acquisitions

ampiO consultants conduct technology due diligence that facilitates a smooth integration process by proactively identifying potential synergies, redundancies, and challenges.

## Cyber Resilience

Build a robust cyber resilience framework that prioritizes both prevention and recovery. Discover the resilience success factors every organization should adopt as digital threats increase.
